FOR IMMEDIATE RELEASE

SJ Distributors launches the Neera Super Cleanse:

New cleansing diet combines with fasting to safely alleviate toxicity and excess weight

SAN FRANCISCO (November 15) -- SJ Distributors, a health and wellness products distributor, has introduced the Neera Super Cleanse, a safe and easy fasting diet that replaces solid food with a natural and nutritious fruit juice and tree syrup beverage, allowing the body to detoxify and lose excess weight. A million people in Europe have succeeded with the diet. Now it comes to America.

The Neera Super Cleanse combines lemon juice and the liquid nourishment of palm syrups and pure Canadian grade C maple syrup in a mineral-balanced syrup that nourishes the body during a cleansing fast. The Neera Super Cleanse package includes the syrup, organic cayenne pepper, tea and a new book about the diet. Neera can be purchased at select health food stores, retail outlets and online at www.NeeraSuperCleanse.com.

According to Chitvan Rebich, President of SJ Distributors, "The Neera Super Cleanse has proven itself effective throughout Europe in helping people gain health and lose weight. It has also been endorsed by leading European healthcare professionals."

Fasting has been used for thousands of years for its healing abilities. Recent scientific studies at major universities and health organizations have shown that occasional fasting helps prevent colds and flu, fends off diabetes, safely reduces weight, lessens the chances of cancer and lengthens life spans. During a fast, the digestive and eliminative organs of the body are able to rest and can focus on internal cleansing. The body gets a chance to remove accumulated toxic substances and to break down damaged, diseased and unneeded cells like abscesses, excess fat deposits and congestive wastes.

"I have done many fasts and always felt tired and worn down. When I did the Neera Super Cleanse I felt great, had energy to keep me going at work and I lost 9 pounds in five days. I have recommended it to numerous customers who have also had great results," said David Stouder, owner Apple Health Foods and host of "The Vitamin Shelf" on KEST.
